Wörterbuch der Uchee Sprache,

A Vocabulary of the language
of the Uchee Indians collected
by Mr. Ware of Natchez.

The Uchee Indians live on
Catahouche near the mouth of
Stint River, within the bounds of
the State of Georgia. They are
said to be the most ancient nation
on those parts, but are nearly ex-
tinct. Only about a thousand of
them remain, of whom about
300. warriors. They are mixed
with the Creeks, and speak their
language, tho' many of them
still retain their own. This language
appears different from all the
others that are known within the
limits of the United States. Its
sounds are exceedingly harsh and
guttural, and they have a click
like that, which is ascribed to the
Hottentots. The nasal sounds, as
then, an, are pronounced as in
French. The Apostrophe (?) is in
the place of the Hottentot click.
